CONTENTS.

SERIES B. VOL. LXXVI.

No. B 507.—April 22, 1905.

PAGE

Address delivered by the President, Sir William Huggins, K.C.B., O.M., F.R.S., at the Anniversary Meeting on November 30, 1904 1

Researches on some of the Physiological Processes of Green Leaves, with special Reference to the Interchange of Energy between the Leaf and its Surroundings. By Horace T. Brown, LL.D., F.R.S., and F. Escombe. (This paper, and the three following ones, constituted the Bakerian Lecture for 1905.) 29

On a New Method for the Determination of Atmospheric Carbon Dioxide, based on the Rate of its Absorption by a Free Surface of a Solution of Caustic Alkali. By Horace T. Brown, F.R.S., and F. Escombe 112

On the Variations in the Amount of Carbon Dioxide in the Air of Kew during the years 1898–1901. By Horace T. Brown, F.R.S., and F. Escombe 118

On the Thermal Emissivity of a Green Leaf in Still and Moving Air. By Horace T. Brown, LL.D., F.R.S., and W. E. Wilson, D.Sc., F.R.S. 122

No. B 508.—May 24, 1905.

On the Absence or Marked Diminution of Free Hydrochloric Acid in the Gastric Contents, in Malignant Disease of Organs other than the Stomach. By Benjamin Moore, M.A., D.Sc., Johnston Professor of Bio-Chemistry in the University of Liverpool (in collaboration with W. Alexander, M.D., M.Ch., F.R.C.S., Hon. Surgeon, Royal Southern Hospital, Liverpool; R. E. Kelly, M.B., B.Ch., B.Sc., Alexander Fellow, University of Liverpool; and H. E. Roaf, M.B., Johnston Colonial Fellow, University of Liverpool). Communicated by Professor C. S. Sherrington, F.R.S. 138

On Reciprocal Innervation of Antagonistic Muscles.—Seventh Note. By C. S. Sherrington, F.R.S. 160

A Preliminary Note upon the Question of the Nutrition of the Early Embryo, with Special Reference to the Guinea-pig and Man. By E. Emrys-Roberts, M.B. (Liverpool), Ethel Boyce Research Fellow in Gynæcological Pathology in the University of Liverpool. Communicated by Professor C. S. Sherrington, F.R.S. 164

The Influence of Cobra-venom on the Proteid Metabolism. By James Scott, M.D., C.M., B.Sc. Edin. Communicated by Sir Thomas R. Fraser, F.R.S. 166

On the Physical Chemistry of the Toxin-Antitoxin Reaction: with Special Reference to the Neutralisation of Lysin by Antilysin. By J. A. Craw,

PAGE

Research Student, Lister Institute of Preventive Medicine. Communicated by Dr. C. J. Martin, F.R.S. 179

Two Cases of Trichromic Vision. By F. W. Edridge-Green, M.D., F.R.C.S. Communicated by Dr. F. W. Mott, F.R.S. 194

The Colour-Physiology of the Higher Crustacea, Part III. By Frederick Keeble, M.A., University College, Reading, and F. W. Gamble, D.Sc., Zoological Department, Victoria University, Manchester. Communicated by Professor Sydney J. Hickson, F.R.S. (Abstract)..... 198

On Colour-Vision by Very Weak Light. By George J. Burch, M.A., D.Sc. Oxon. ; F.R.S. ; Lecturer in Physics, University College, Reading 199

No. B 509.—June 28, 1905.

On the Nature of the Silver Reaction in Animal and Vegetable Tissues. By A. B. Macallum, M.A., M.B., Ph.D., Professor of Physiology in the University of Toronto. Communicated by W. D. Halliburton, F.R.S. 217

On the Resemblances existing between the "Plimmer's Bodies" of Malignant Growths, and Certain Normal Constituents of Reproductive Cells of Animals. By J. Bretland Farmer, F.R.S., J. E. S. Moore, and C. E. Walker..... 230

Observations on the Brains of Men and Animals infected with Various Forms of Trypanosomes. Preliminary Note. By F. W. Mott, M.D., F.R.S. 235

On a New Rhabdosphere. By George Murray, F.R.S. 243

On some New Species of Lagenostoma, a Type of Pteridospermous Seed from the Coal Measures. By E. A. Newell Arber, M.A., F.L.S., F.G.S., Trinity College, Cambridge, University Demonstrator in Palæobotany. Communicated by D. H. Scott, F.R.S. (Plates 1 and 2) 245

Ovulation and Degeneration of Ova in the Rabbit. By Walter Heape, M.A., Trinity College, Cambridge. Communicated by Adam Sedgwick, F.R.S. 260

On Reciprocal Innervation of Antagonistic Muscles.—Eighth Note. By C. S. Sherrington, D.Sc., F.R.S. 269

No. B 510.—August 3, 1905.

On the Dimorphism of the English Species of *Nummulites*, and the Size of the Megalosphere in Relation to that of the Microspheric and Megalospheric Tests in this Genus. By J. J. Lister, M.A., F.R.S., Fellow of St. John's College and Demonstrator of Comparative Anatomy in the University of Cambridge. (Plates 3—5) 298

On the Occurrence of *Anopheles* (*Myzomyia*) *Listoni* in Calcutta. By J. R. Adie, M.B. (Lond.), Major, I.M.S., and A. Alcock, M.B., LL.D., F.R.S., Major, I.M.S. 319

The Structure and Function of Nerve-Fibres.—Preliminary Communication. By J. S. Macdonald, Professor of Physiology in the University College, Sheffield. Communicated by Professor C. S. Sherrington, F.R.S. 322

On the Effect of Carbon Dioxide on Geotropic Curvature of the Roots of *Pisum sativum*, L. By Eric Drabble, D.Sc., F.L.S. (Demonstrator in Botany, Royal

PAGE

College of Science), and Hilda Lake. Communicated by J. Bretland Farmer, F.R.S. 351

Preliminary Note on the Occurrence of Microsporangia in Organic Connection with the Foliage of Lyginodendron. By R. Kidston, F.R.S.L. and E., F.G.S. (Plate 6) 358

On the Efferent Relationship of the Optic Thalamus and Deiter's Nucleus to the Spinal Cord, with Special Reference to the Cerebellar Influx Theory (Hughlings Jackson) and the Genesis of Decerebrate Rigidity (Sherrington). By F. H. Thiele, M.D., B.Sc., M.R.C.P., Pathologist to University College Hospital. Communicated by Sir Victor Horsley, F.R.S. 360

On Endophytic Adaptation shown by *Erysiphe Graminis* DC. under Cultural Conditions. By Ernest S. Salmon, F.L.S. Communicated by Professor H. Marshall Ward, F.R.S. (Abstract) 366

A Preliminary Communication on the Life History of *Trypanosoma Balbianii*. By W. S. Perrin, B.A., Shuttleworth Research Student of Gonville and Caius College, Cambridge. Communicated by A. Sedgwick, F.R.S. 368

On the Chemical Mechanism of Gastric Secretion. By J. S. Edkins, M.A., M.B. Cantab., Lecturer on Physiology in the Medical School of St. Bartholomew's Hospital, London. Communicated by Professor C. S. Sherrington, F.R.S. 376

A Preliminary Note on the Susceptibility of Goats to Malta Fever. By Dr. T. Zammit, Member of the Mediterranean Fever Commission. Communicated by Colonel D. Bruce, C.B., F.R.S., R.A.M.C. 377

Preliminary Note on Goats as a Means of Propagation of Mediterranean Fever. By Major W. H. Horrocks, R.A.M.C., Member of the Mediterranean Fever Commission. Communicated by Colonel Bruce, C.B., F.R.S. 378

No. B 511.—September 2, 1905.

On the Occurrence of Certain Ciliated Infusoria within the Eggs of a Rotifer, considered from the Point of View of Heterogenesis. By H. Charlton Bastian, M.A., M.D., F.R.S. (Abstract.) (Plate 7) 385

The Morphology of the Ungulate Placenta, particularly the Development of that Organ in the Sheep, and Notes upon the Placenta of the Elephant and Hyrax. By Richard Assheton, M.A., Lecturer on Biology in the Medical School of Guy's Hospital, University of London. Communicated by A. Sedgwick, F.R.S. (Abstract) 393

Contributions to the Physiology of Mammalian Reproduction. Part I.—The Œstrous Cycle in the Dog. Part II.—The Ovary as an Organ of Internal Secretion. By Francis H. A. Marshall, Carnegie Fellow in the University of Edinburgh ; and William A. Jolly, Assistant to the Professor of Physiology in the University of Edinburgh. Communicated by Professor E. A. Schäfer, F.R.S. (Abstract) 395

Chitin in the Carapace of *Pterygotus osiliensis*, from the Silurian Rocks of Oesel. By Otto Rosenheim, Ph.D. Communicated by Professor W. D. Halliburton, F.R.S. 398

PAGE

On a New Species of *Cephalodiscus* (*C. nigrescens*) from the Antarctic Ocean. By E. Ray Lankester, M.A., D.Sc., LL.D., F.R.S., Director of the Natural History Departments of the British Museum. (Plate 8) 400

Experimental Researches in Vegetable Assimilation and Respiration. IV.—A Quantitative Study of Carbon-Dioxide Assimilation and Leaf-Temperature in Natural Illumination. By F. Frost Blackman, D.Sc., Fellow of St. John's College, Reader in Botany in the University of Cambridge, and Gabrielle L. C. Matthaei, B.A., Fellow of Newnham College. Communicated by Francis Darwin, For. Sec. R.S. 402

Note on the Mechanics of the Ascent of Sap in Trees. By Professor J. Larmor, Sec. R.S. 460

No. B 512.—October 7, 1905.

On the Cytology of Apogamy and Apospory.—II. Preliminary Note on Apospory. By Miss L. Digby. Communicated by Professor J. B. Farmer, F.R.S. 463

The Pharmacology of Indaconitine and Bikhaconitine. By J. Theodore Cash, M.D., F.R.S., and Wyndham R. Dunstan, M.A., LL.D., F.R.S. 468

The Synthesis of a Substance allied to Adrenalin. By H. D. Dakin. Communicated by Professor E. H. Starling, F.R.S. 491

On the Physiological Activity of Substances Indirectly Related to Adrenalin. By H. D. Dakin. Communicated by Professor E. H. Starling, F.R.S. 498

Transmission and Inoculability of *Spirillum Theileri* (Laveran). By Dr. A. Theiler. Communicated by Colonel David Bruce, R.A.M.C., F.R.S. 504

An Experimental Enquiry into the Nature of the Substance in Serum which influences Phagocytosis. By George Dean, M.A., C.M., M.B., Bacteriologist-in-Charge of the Serum Department of the Lister Institute of Preventive Medicine, London. Communicated by Professor J. Rose Bradford, F.R.S. 506

The Phagocytosis of Red Blood-Cells. By J. O. Wakelin Barratt, M.D., B.Sc. Lond., British Medical Association Research Student. Communicated by Sir Victor Horsley, F.R.S. 524

Report on the Anatomy of the Tsetse-fly (*Glossina palpalis*). By E. A. Minchin, M.A., Professor of Zoology and Comparative Anatomy in University College, London, late Fellow of Merton College, Oxford. Communicated by Professor E. Ray Lankester, F.R.S. 531

No. B 513.—November 9, 1905.

The Dual Force of the Dividing Cell. Part I.—The Achromatic Spindle Figure Illustrated by Magnetic Chains of Force. By Marcus Hartog, M.A., D.Sc., F.R.U.I. Communicated by Sir W. Thiselton Dyer, F.R.S. (Plates 9—11) ... 548

On the Probable Existence of Emulsin in Yeast. By Thomas Anderson Henry, D.Sc. (Lond)., Principal Assistant in the Scientific and Technical Department of the Imperial Institute, and S. J. M. Auld, Ph.D. (Würzburg), Assistant in the Scientific and Technical Department of the Imperial Institute. Communicated by Professor Wyndham Dunstan, F.R.S. 568

PAGE

On the Inheritance of Heterostylism in *Primula*. By W. Bateson, M.A., F.R.S., and R. P. Gregory, M.A. 581

Further Experiments and Histological Investigations on Intumescences, with some Observations on Nuclear Division in Pathological Tissues. By Miss Elizabeth Dale. Communicated by Professor H. Marshall Ward, F.R.S. (Abstract)..... 587

The Experimental Treatment of Trypanosomiasis in Animals. By H. Wolferstan Thomas, M.D., C.M. (McGill) (J. H. Todd Memorial Fellow in Tropical Medicine), Liverpool School of Tropical Medicine, Johnston Tropical Laboratory, University, Liverpool. Communicated by Professor R. Boyce, F.R.S. ... 589

Studies on Enzyme Action. VII.—The Synthetic Action of Acids contrasted with that of Enzymes. Synthesis of Maltose and Isomaltose. By Edward Frankland Armstrong, Ph.D., D.Sc., Salters' Company's Research Fellow, Chemical Department, City and Guilds of London Institute, Central Technical College. Communicated by Professor H. E. Armstrong, F.R.S. 592

Studies on Enzyme Action. VIII.—The Mechanism of Fermentation. By Edward Frankland Armstrong, Ph.D., D.Sc., Salters' Company's Research Fellow, Chemical Department, City and Guilds of London Institute, Central Technical College. Communicated by Professor H. E. Armstrong, F.R.S 600

Studies on Enzyme Action.—Lipase. By Henry E. Armstrong, F.R.S. 606

Index 609
